EXPERIENCE

- **Software Engineer** Remote/Bengaluru
• gocobalt.io May 2023 - Current
 - Being one of the earliest members of engineering team, I built multiple core features of Cobalt from ground up.
 - Planned, designed and shipped core features like custom apps, ecosystem, functions, workflow versioning, integration logs, auth, internal retries for auth etc.
 - Added many internal nodes like Tables, Response, PDF, Functions etc.
 - Wrote one of the three microservices from scratch that Cobalt runs on.
 - Added multiple integrations like Hubspot, Salesforce, Greenhouse, Brevo etc. being used by multiple customers.
- **Full Stack web developer intern** Remote
• itmtb.com June 2022 - December 2022
 - **Prospareto:** Implemented a multistrike OI feature in Prospareto.com, enhancing its functionality.
 - **itmtb.com:** Redesigned the UI of itmtb.com using Next.js, Tailwind and added blog functionality.
 - **V-Siah:** Developed the backend for the MVP of V-Siah (www.v-siah.co.in), a healthtech app.

PROJECTS

- **Genshin API (API, Backend):** A public API for the game Genshin-impact.
Tech: Node, ExpressJS, Cloudflare R2 (August '22)
- **Hackernews-lite (SPA, Curated tech news, Web app):** (Work in progress) A new and better version of news.ycombinator.com with better UI and extra features (like bookmarking stories).
Tech: ReactJS, Bootstrap 5, Axios, Official hackernews API. (February '22)
- **Quotes (SPA, Web development):** My personal collection of quotes I've collected over the years while reading and debating.
Tech: NextJS, Tailwind, DaisyUI, Golang, Gin. (January '23)

VOLUNTEER EXPERIENCE

- **Core Team member of GDSC** New Delhi, India
• *Member of core team and OC. Conducted many sessions on technical topics.* 2020 - 2023
- **Technical Writer** Remote
• *Wrote blog posts on dev.to and medium to help beginners.* Jan 2020 - Present
